

CP43ARP

Connection plate - rj45 + repeater - bticino

Product information:

The CP43ARP allows you to attach one APM paging console on the front, while the phoenix connector on the back lets you route the signal to a next paging console or junction box. It can offer 20V power to the APM console and is also equipped with 2 jumpers to terminate the audio -or databus. An advantage the ARP version has over the ARJ version is that it also offers a built-in repeater. This repeater extends the maximum distance from 300m to 600m. This device is also fully compatible with bTicino installation materials.
