# HERCHILD 670

DUAL CHANNEL  
TUBE COMPRESSOR/LIMITER

# The HERCHILD Model 670 is a tube-based beast that will take your tracks to the next level.

With 22 valves and 9 transformers you can be sure your tracks will receive the attention they deserve with all the warmth and punch you can imagine while maintaining almost no noise or distortion at all making it a great option for Mixing and Mastering. A faithful reproduction to the original with a few key additions to make it more practical for modern day studio use. Now with a selectable side chain filter and accessible control to the slope you'll be able to fine tune your compression needs to sculpt the ultimate masterpieces.

This is the two channel version that also offers the possibility to work in other modes of operation such as LINKED Stereo as well as MID/SIDE and MID/SIDE LINKED.
