- Included 4 swivel bearing casters (2 x with brake)
- Transports flightcases or other heavy equipment
- 570 x 530 mm dimensions
- Mounting holes for matching flightcases
- Elliptical handle cutout for easy carriage

Product information:

The FCB104 is a caster board for transportation of flightcases or other heavy equipment. The construction is made out of solid and high quality plywood with a thickness of 18 mm. Four swivel bearing casters with 100 mm (4") diameter and blue rubber tyre are mounted underneath, two braked and two unbraked. Mounting holes for flightcases are provided, allowing instant and permanent fixation to matching flightcases using the included fastener (M8x50mm). Two oval shaped cutouts offer great convenience for movement and carriage of the caster board. Superior durability is guaranteed through the Penn-Elcom® casters.
